

For the Bits:

- Material: We require Heat-treated S2 alloy steel.
- Surface Treatment: The bits should be treated with zinc phosphate.

For the Sockets:

- Material: We'd like the sockets to be crafted from Hardened treated Chrome Vanadium steel.
- Finish: Please ensure that the sockets have a fully polished, Chrome plated mirror finish and double grooves
- Sizes and Logo: We request that the sizes and our logo be stamped onto the sockets.

Can you provide me with a lab test report that includes the Rockwell Hardness (HRC) measurements for the bit and socket, as well as the maximum torque capacity in inch-pounds that they can safely handle?

Kindly Emails us back via email at manufacturing@makethebrands.com
